

Stage 2 Borambola Excursion

On Wednesday the 18th November, 37 Stage 2 students from 3/4L and 3/4B swapped desks and workbooks for fresh air and outdoor activities when they visited Borambola Sport and Recreation Centre. The students were split into their class groups and the active outdoor learning program included kayaking, orienteering and pool games.

During orienteering the students learnt how to read a map and follow a route to locate 20 tags around the camp and record the symbol they found. The students worked collaboratively in small groups and displayed excellent team work.

The students reported that kayaking was the favourite activity of the day. Each group spent around 45 minutes in the water and they developed skills in rowing forward, backward and turning their kayaks around. They played a game of tip in the kayaks and the children found chasing one another around exciting and funny. They also successfully made rafts of varying sizes as well as whole class rafts.

They thoroughly enjoyed ending the day cooling down in the pool with a few games. Their enjoyment was evident with lots of chanting, laughs and huge smiles on the faces of all the children.

The adventurous activities were certainly a lot of fun, and the program was a great opportunity for the kids to challenge their abilities, and develop teamwork and communication skills. All in all it was a very enjoyable day.
